VARNISH

**Enamel Pro® Varnish Clear**  
PREMIER

The ONLY fluoride varnish formulated to deliver ACP (Amorphous Calcium Phosphate).

ACP works together with fluoride to desensitise the dentine by providing a semi-permanent occlusion with fluorapatite. Enamel Pro Varnish CLEAR with ACP technology has been proven to deliver 4X more fluoride uptake to enamel than any other transparent varnish on the market. Choose from delicious Strawberries & Cream or Bubblegum flavours. Packaged in convenient foil sealed single use doses with individual applicator brushes, packs of 35 or 200.

Each box contains single-unit doses and an applicator brush, one Comfy-grip™ cup holder, Post-application patient care instructions and doctor's directions for use.

\*Scientific studies available on request.

50 x 40ml Single Dose  
VOC1269 

**Bifluorid 10**  
VOCO

Fluoride varnish for the treatment of hypersensitivity including cervical area and crown margins, after cleaning and calculus removal, after preparation and/or grinding. Also use for treatment of worn occlusal surfaces and teeth carrying clasps, after injury of the enamel and as a dentine protection/lining under amalgam fillings.

Bifluorid 10 5x Clinical Bottles, 10grams.  
VOC1616 

PIT & FISSURE

**★★★★★ REALITY'S CHOICES**  
**UltraSeal XT® Plus™**  
ULTRADENT

UltraSeal XT plus pit and fissure sealant provides exciting improvements in sealant technology. The light-cured, 58% filled resin makes UltraSeal XT plus a stronger, more wear-resistant composite sealant. UltraSeal XT plus has less polymerisation shrinkage than competitive products. The spiral brush action of the Inspiral Brush tip causes shear thinning of the filled, thixotropic UltraSeal XT plus, therefore decreasing its viscosity as it is placed. Resin firms when shear thinning ceases (placement complete) and helps prevent resin from running before it can be light cured. UltraSeal XT plus is significantly superior to other pit and fissure sealant materials.

UltraSeal XT plus kit contents:  
1 x 1.2ml UltraSeal XT plus syringe  
1 x 1.2ml UltraEtch syringe  
2 x 1.2ml PrimaDry syringes  
20 x Inspiral Brush tips  
20 x Blue Micro Tip

**Prima Dry**  
ULTRADENT

Use PrimaDry in fissures just prior to resin placement, followed by air drying. PrimaDry enhances resin penetration significantly.

PrimaDry Refill - 4 x 1.2ml PrimaDry Syringes

ULT0716 

BEFORE AFTER

**Universal Dentin Sealant**  
ULTRADENT

Universal Dentin Sealant is a biocompatible, non-polymerisable, high molecular weight resin in a volatile organic solvent. Ideal for coating sensitive roots following root planing and minimising patient post-op discomfort by sealing dentinal tubules. Forms a virtually impenetrable temporary biocompatible barrier against bacteria, resins, acids, cements, and restorations.

Universal Dentin Sealant Refill,

pack of 4 x 1.2ml syringe  
ULT0266 

**THE DENTAL ADVISOR**  
★★★★  
**Ionoseal**  
VOCO

Light-cured ready-for-use Glass Ionomer Composite Cement for lining under all types of material. Can also be used as an extended fissure sealant and for restoration of smaller lesions. Fluoride release and high biocompatibility properties to prevent secondary caries. High compressive strength (210MPa) and Radiopaque.

Ionoseal Glass Ionomer Composite Liner 2x4g tubes  
VOC1126 

## GUM MANUAL TOOTHBRUSHES

### GUM Technique +

Special non-slip thumb grips are uniquely positioned so the bristles are effortlessly directed to the sulcus at a 45 degree angle for optimal below-the-gumline cleaning. The 4 thumb grips provide guides to the 45° angle while brushing all 4 quadrants of the mouth.
